

DISINFECTANT-ANTISEPTIC FOR HANDS

DESCRIPTION

FARMITRAM BAC is a water-alcohol antiseptic to hygienically treat hands. It does not dry out skin and protects it from foreign agents. Especially recommended for dry disinfection of hands when handling food in the food and restaurant industry.

CHARACTERISTICS

- With yeasticidal and bactericide activity
- Includes skin-protection agents that care for and protect the handler's skin, without drying it out.
- Since this is a volatile product, it degrades and evaporates immediately.
- It leaves no residual smell or flavour that might contaminate washed items.
- Non-toxic and non-aggressive to skin.

PHYSICAL-CHEMICAL PROPERTIES

APPEARANCE AND COLOUR	pH	DENSITY (20°C)	COMPOSITION
Green transparent liquid	4.02 ± 0.5	0.851 ± 0.02 g/cm ³	75% Propan-2-ol, 0.6% L-(+)-lactic acid, 0.1% Chlorhexidine Diclucinate (0.5g of chlorhexidine dicluconate solution at 20% in 100g), water and excipients, amount sufficient for 100g.

INSTRUCTIONS FOR USE

Hygienic hand treatment:

- Apply 5ml of pure **FARMITRAM BAC** with a dispenser or sprayer to clean, dry hands and rub for at least 30 seconds. Apply 5ml of product again and rub for another 30 seconds. Let dry until entirely evaporated.

STORAGE

Store between 5 and 25 °C. The product must be stored away from heat and electricity sources. Do not smoke in the storage area. If possible, avoid direct sunlight. To avoid spillage, once containers are opened, they must be carefully closed again and placed in vertical position. Keep far from reducing agents, oxidising agents, acids and alkalis.

RECOMMENDATIONS

Use before the expiration date (24 months after the shipping date).

PRECAUTIONS

See the **safety information** for additional information on our product.
